

Generating Music Using AI

1. Tools & Platforms Used

In this end-to-end multimedia creation pipeline, we utilized five core artificial intelligence and video editing tools:

- i. **Gemini Pro:** Used for initial brainstorming, structural song prompt generation, audio-visual scene breakdown, and screenplay directing.
- ii. **Claude:** Employed for prompt engineering, lyric refinement, bilingual balancing (English & Bengali), and parameter calibration for the music AI.
- iii. **Suno AI (v4.5 Advanced Mode):** Used to compose and render the full-length, broadcast-quality 4:32 minute audio track with authentic instrumentation and vocals.
- iv. **Canva AI:** Utilized for generating visual assets, motion graphics, concept art, and high-resolution scene renders corresponding to each storyboard cue.
- v. **YouCut Mobile Video Editor:** Applied during the post-production assembly phase for rapid timeline slicing, video-to-audio synchronization, transitions, color grading, and mobile rendering.

2. Initial Prompts Used

The creative process began by formulating an initial structured role-play prompt inside Gemini Pro to define the musical story and emotional scope:

Act as an expert music producer and lyricist for Suno AI (v4.5 Advanced Mode).

- 1.Core Emotion/Story: [i wanted to make a song for my friends our golden school days and the years we passed with joy and happiness . nosotologia about that little bit]*
- 2.Musical Vibe/Genre: [emotional adjective + genre + reference artist/song]*
- 3.Language: [Bengali 40 % / English 60% / Mixed]*
- 4.Vocals: [Male / Female / Duet / Instrumental]*
- 5.Length/Energy: [short punchy hook-song / full 1.5-2 min build]*
- 6.Avoid: [anything you don't want — cheesy lyrics, autotune, slow tempo, etc.]*

3. How We Improved the Prompt

To transform this draft framework into production-ready instructions, we ported the concept to [Claude](#) to perform precision prompt engineering and lyric harmonization. Claude enhanced the prompt across four major dimensions:

1. **Style & Instrumentation Prompting:** Refined into 'nostalgic pop-rock anthem, emotional coming-of-age vibe, 95 BPM building to 115 BPM, warm acoustic guitar intro, soaring electric guitar in chorus, soft piano layers, gang vocal singalong outro, reverb-drenched warm vocals, cinematic youth-movie soundtrack feel, no autotune, organic live-band instrumentation'.
2. **Vocal Architecture:** Specified male lead vocals complemented by anthemic group/gang vocals during choruses and outros to capture authentic friend-group camaraderie.

3. **Parameter Calibration:** Optimized Suno AI sliders with Weirdness at 10% (keeping it warm and cohesive), Style Influence at 70%, and Audio Influence at 0%.
4. **Lyrical Composition:** Crafted a seamless 60% English / 40% Bengali bilingual blend featuring vivid school memories (old wooden desks, recess bells, tiffin sharing, rainy rooftops, late-night study calls, and nostalgic friendship pledges).

5. 4. LYRICS (~60% English, ~40% Bengali)

[Intro]

(soft guitar strum, distant laughter fading in)

Remember those days... shei দিনগুলো

[Verse 1]

Old wooden desks, নাম লেখা with pride,

First friendships made, পাশাপাশি ছিলাম side by side,

Recess bells ringing, ছুটে চলা হলঘরে,

Sharing our lunch, we had it all

[Pre-Chorus]

Time kept moving, কিন্তু মন একই রয়ে গেছে,

Every laugh, every dream, still জানি তোঁর নাম,

Some things never fade, যতই দূরে যাই না কেন,

Those golden days made us who we are

[Chorus]

This is for the days আমরা ফিরে পাব না,
সোনালী দিন, on a golden track,
Running wild, dreaming big, পাশাপাশি হাঁটা,
Best days of our lives, ফিরে আসবে না আর

[Verse 2]

Rainy afternoons, ছাদে দাঁড়িয়ে থাকা,
Late night study calls, পরীক্ষার আগে জাগা,
Every little moment, প্রতিটা ছোট্ট ঝগড়া,
Somehow made those years স্বপ্নের মতো সুন্দর

[Chorus]

This is for the days আমরা ফিরে পাব না,
সোনালী দিন, on a golden track,
Running wild, dreaming big, পাশাপাশি হাঁটা,
Best days of our lives, ফিরে আসবে না আর

[Bridge]

(strip down to soft vocals and piano)
Wherever this life may take us now,
তুই থাকবি আমার memory তে, somehow,
So here's to the friends যারা এটা worth করে তুলেছিল,
Golden days, আমরা কখনো ভুলব না

[Final Chorus - big, full band, gang vocals]

THIS IS FOR THE DAYS আমরা ফিরে পাব না,
সোনালী দিন, ON A GOLDEN TRACK,
RUNNING WILD, DREAMING BIG, পাশাপাশি হাঁটা,
BEST DAYS OF OUR LIVES, ফিরে আসবে না আর!

[Outro]

(fading gang vocals, soft guitar, bell sound)

Those golden days... আজও মনে পড়ে

Forever friends... forever we

4. Audio Generation, Scene Breakdown & Deliverables

Executing the engineered prompt in Suno AI generated a 4-minute-and-32-second full MP3 track. We then analyzed the audio cue points in Gemini Pro to produce a synchronized 2-minute visual storyboard for Canva AI and AI video tools:

Scene 1 (0:00 – 0:15) | The Golden Hour Introduction

Audio Cue: Acoustic intro & 'Remember those days... shei din gulo...'

Visual Action: Warm golden afternoon sun pouring through an empty high school corridor. Dolly-in shot of old wooden desks carved with initials.

Cinematography: Slow push-in, 35mm film grain, warm amber lighting, shallow depth of field.

Canva / AI Prompt: Cinematic wide shot of an empty nostalgic classroom,

golden hour sunlight streaming through vintage window frames, floating dust particles, warm tones, 35mm film aesthetic, photorealistic, 16:9

Scene 2 (0:15 – 0:35) | Recess & Shared Lunches

Audio Cue: 'First friendships made... Recess bells ringing... Sharing our lunch...'

Visual Action: Handheld dynamic shot of 3–4 teenage friends running down the hallway as the bell rings, laughing and sharing food from steel tiffin boxes.

Cinematography: Handheld medium tracking shot, vibrant colors, candid motion blur, joyful expressions.

Canva / AI Prompt: Group of South Asian high school friends laughing together in a classroom, sharing lunch from tiffin boxes, joyful candid interaction, natural afternoon lighting, cinematic depth, authentic emotion --ar 16:9

Scene 3 (0:35 – 0:55) | The Chorus Euphoria (Golden Track)

Audio Cue: 'This is for the days amra phire pabona... Shonali din on a golden track... Running wild...'

Visual Action: Wide open green field with friends running under an expansive sunset sky, arms open wide, silhouette edge lighting.

Cinematography: Low-angle gimbal tracking shot moving backward, slow motion 60fps, dramatic orange-pink sky.

Canva / AI Prompt: Group of young friends running across an open green field into a breathtaking golden hour sunset, slow motion, silhouettes with warm rim light, cinematic lens flare, coming-of-age film style --ar 16:9

Scene 4 (0:55 – 1:20) | Rainy Rooftops & Late Night Calls

Audio Cue: 'Rainy afternoons, chade dariye thaka... Late night study calls, porikkhar agey jaga...'

Visual Action: Drenched friends laughing in tropical monsoon rain on an

old rooftop terrace, transitioning into a moody late-night desk with glowing phone and study books.

Cinematography: Rain splash macro details transitioning to low-key teal & tungsten contrast.

Canva / AI Prompt: Teens drenched in pouring monsoon rain on an old Dhaka rooftop terrace, cinematic rain particles, neon-lit city background, emotional atmosphere, high detail --ar 16:9

Scene 5 (1:20 – 1:45) | Second Chorus & Peak Nostalgia

Audio Cue: 'This is for the days... Pasha pashi haata... Best days of our lives...'

Visual Action: Fast-paced montage of friends walking shoulder to shoulder down a tree-lined street at dusk, warm streetlights illuminating memories.

Cinematography: Rotating camera around the group, warm flares, nostalgic soft focus.

Canva / AI Prompt: Group of best friends walking side by side down a quiet tree-lined urban street at dusk, warm streetlights turning on, soft cinematic lighting, heartfelt camaraderie --ar 16:9

Scene 6 (1:45 – 2:00) | The Memory & Timeless Drift

Audio Cue: 'Wherever this life may take us now... Tui thakbi amar memory-te...'

Visual Action: The group stops at the horizon as the sun dips. A slow pull-back overhead drone shot rises into twilight, leaving silhouettes etched in memory.

Cinematography: Aerial pull-out crane shot, deep twilight blue and fading orange gradient, bittersweet mood.

Canva / AI Prompt: Wide aerial drone shot pulling back from silhouettes of friends standing together watching a deep twilight horizon, fading sunset sky, bittersweet cinematic ending, award-winning cinematography --ar 16:9

5. Post-Production & Delivery Package

Post-Production Execution: The generated scene clips and Suno master audio were imported into the YouCut mobile application for rapid assembly, beat-matching, cross-dissolve transitions, and final color pass. For advanced mastering, project timelines can be extended to desktop (Premiere Pro, DaVinci Resolve, After Effects).

Project Files & Deliverables/ Output:

- i. Master Audio File: golden_days_nostalgia_master.mp3 (4:32 duration, 320 kbps high-fidelity audio).
- ii. Visual Assets Archive: music_video_production_assets.zip (contains high-resolution scene renders from Canva AI, scene storyboard metadata, lyrics sheet, and compiled 2-minute video project files).

Remarks:

This chapter illustrates an evolution of the modern storytelling that has taken place in the world of digital storytelling, from isolated experiments with AI prompts to a whole multi-AI storytelling production system. We have a range of control over the work, with each tool operating in its own special capacity: from conceptualizing the architecture and visual storytelling with Gemini Pro, refining the lyrics and two-way nuance with Claude, musical synthesis with the organic capabilities of Suno AI and final touches to the frame with Canva AI and Gemini Pro . Ensuring that every element of the visual generation is properly grounded in the emotional flow of the song and against the music's timestamps dictates and powers a consistent narrative flow, whilst the fact that the visuals can be built with a mobile-first approach in YouCut means that they can be prototyped quickly and advanced work on the desktop with Mycroft ensures an open path for later post-production. In the end this process is proof that artificial intelligence isn't about replacing a human voice, but instead is about creating a very fast canvas on which to draw – rich, broadcast-quality audiovisual depictions that turn deeply personal memories into art.
